◆MORE AIMS OF ~ASP~

WHAT IS ASP ? 😐

WHAT IS ASP USED FOR ?

- ASP Token is one of the Best token Used as Payment
- For the Utility Services ..Our Token"ASP" will be used
- for utility services like D2h and mobile recharges..Our
- Token is originated in India so providing utility services
- will be good for everyone especially indians because
- there are not much token india which provide such
- services.

.As D2h, Broadband,Mobile recharges are the
most important commodities currently in 21st
century
And ASP TOKEN will be the best Utility Token
ever..Our project
is very clear and simple..and we also aim to
simplify the
interaction between users and the
decentralized world.
We want to make interacting with the
decentralized
ecosystem so easy that anyone can do so
without
worrying about the complexity of the system.

OVERVIEW ON CRYPTOCURRENCIES

A cryptocurrency is a digital asset or digital currency designed to work as a medium of exchange using cryptography to secure the transactions and to control the creation of additional units of the currency. It uses peer-to-peer* (P2P) technology to operate with no central authority.

Cryptocurrency is gaining its popularity and importance as a substitute mode of payments against fiat currencies*. Value can be transacted between participants on a decentralized computer networks, with relatively minor transaction fees as compare to conventional wired transferring methods, is secure, time efficient, and protect privacy.

Bitcoin was created by Satoshi Nakamoto in 2008, and became the first decentralized crypto-currency in 2009; it set the benchmark for digital currencies. Bitcoin and most of the crypto-currencies use Proof- of-Work (PoW) protocols to solve difficult algorithms as the backbone of mining and security model.

Acquisition of external hardware is essential for effective mining and huge consumption of electricity is needed. These create energy wastage and involve huge operational costs.

Another method is the Proof-of-Stake (PoS) protocol, which is based on coin age to generate node via a hashing scheme that do not consume much energy. Security level of network is not dependent on energy consumption in long term thus providing energy efficient and more cost competitive P2P cryptocurrency

✤✤ OUR GREAT FEATURES ✤✤

ASP project has some great features
like Safe and Secure Payment
ecosystem,
ASP Community,Powerfull system and
Good Technologies..

ASP Token Details
Token Name- ASP
Token Symbol (Ticker)-ASP
Token Standard
TRC20(TronBlockchain)
Total Supply-100M
Precision(Decimals)-6

, ▦ ▦ BLOCK CHAIN ▦ ▦

- The blockchain is the digital ledger in which transactions made in
- Cryptocurrency is recorded chronologically and publicly, and can be
- processed
- by decentralized computers. This decentralized ledger keeps a record of each
- transaction that occurs across a fully distributed peer-to-peer Network, either
- public or private.
- Blockchain system is governing the transaction administration through
- mathematical algorithms which convert the information in an encrypted block,
- and only readable with the correct key. All transactions data and blocks
- information are maintained in Blockchain.
- ASP uses TRON Block chain platform, to initiate the processor block
- and
- premined 100% from PoW method. Thereafter the network distribution
- consensus is maintained by coin holders, via PoS validation protocol and eco-
- minting process. The ASP network consumes far less energy, and rewards
- users in more sustainable ways.

The History of Tron and its Features

1) 📋 ABOUT TRON 🗄️

Tron (TRX) is a Blockchain platform launched as the foundation for a Decentralized entertainment ecosystem. Created by controversial figure Justin Sun, Tron focuses on enlarging the market of decentralized digital content applications by making it easier to develop and deploy them.

The Tron mainnet launched Jun 2018, and the Tronix TRX is the proprietary Crypto-currency token of the Tron Blockchain. Tron is designed to ease this transition and therefore hasten the decentralization of existing platforms and creation of new DApps.

TRON also captured Bit Torrent in July 2018 to further its mission of creating a decentralized eco-system. TRON's native token TRX is a currently the World's 5th largest crypto-currency with a market cap of more than $5.0 billion (as of January 5, 2018).

FEATURES

1) FASTER TRANSACTION SPEED

Comparing Tron coin to other familiar crypto-currencies like Bitcoin and Ethereum, the Tron blockchain is much faster in terms of handling transactions. The block nodes are usually limited and selected by Tron users who act as witnesses. With the choice of the high calculation performance block nodes, it helps to reach high throughput by maintaining TPS (transaction per second) of the Tron network on an acceptable level. It is important to note that Tron has a higher TPS than both Bitcoin and Ethereum.

2) SCALABILITY

ASP TOKEN
ASP TOKEN COPYRIGHTED ©

Tron's smart contracts are highly efficient which provides multiple ways for the deployment of applications on the Tron network. Also, Tron has the best database system structure and accounting system which makes it easy to actualize complicated models and designs, this, in turn, makes it convenient for the development of projects.

3) LOW TRANSACTION FEE

Cost The entire design of the Tron
framework makes it benefit from
low transaction costs thereby making it
easy for different
applications on the Tron network to grow
their user base; hence
they become commercially competitive.

📊📊 COMPANY ROADMAP 📊📊

- **BIRTH OF ASP:** At the End of june-2020 We plan to Develop Safe & Secure,smart, efficient, transparent,reliable and easy-to-use token and started working on it.

- **Airdrop:** We planned to launch airdrop of asp with team

- LISTING : LISTING SOON

- TARGET :- PLEASE REFER TO PAGE NO. 1

DISCUSSION

- We have created community
- groups on social media Platforms
- like Telegram in which people can
- discuss about various things and
- will be notified about updates and
- people can have fun there
- chatting with others,People can
- help each other and clear that
- doubts

MORE AIMS 🏹🏹

- WE FIRSTLY FULLY AIM TO LIST IN VERY GOOD EXCHANGES AND START BEST STAKING SERVICE

- AND WILL BE UPDATED SOON⚖️
